

IMPROVED STORAGE WRAP MATERIAL

ABSTRACT OF THE DISCLOSURE

The present invention relates to an improved storage wrap material comprising a sheet of material comprising one or more layers, and having a first, active side and a second side, said sheet comprising a plurality of standoffs at a density of greater than about 200 standoffs per square inch; and an adhesive; wherein the standoffs are selected from the group consisting of deformable standoffs, removable standoffs, repositionable standoffs, frangible standoffs, or mixtures thereof; and wherein the storage wrap material is linerless and consists of no reinforcing or supporting elements.
